

MODEL B200
BATTERY, CHARGING, and STARTING SYSTEM
DIAGNOSTIC TESTER

Description:

The B200 tests all 12V lead acid batteries including AGM and GEL batteries from 100 to 1700 CCA's. The tester displays the battery condition as % of available capacity, GOOD, Marginal, or REPLACE status for easy decision making. Battery State of Charge voltage is also displayed. The B200 also tests 12V and 24V starter and charging systems including starter draw, alternator and regulator output (loaded/unloaded), and diode ripple. The voltage range for this tester is 5V to 39.9V. Volts are displayed in real time (volt meter). This tester also features a color graphic LCD with easy to view messages displayed. Reverse polarity protection is provided and loose connection detection is displayed.

Features:

Displays % of available battery capacity	Tests 12V & 24V Starting/Charging Systems
Tests all 12V lead acid batteries	Alternator Ripple Test
100 CCA to 1700 CCA battery size range	Bad cell is detected and displayed
5 TO 39.9V operating range	Test Batteries with International Ratings
Patented conductance technology	Reverse polarity protection
No conversion tables needed	Loose lead detection

Product Specifications:

Stock part number	B200
Description	Battery, Charging, Starting System Tester
Battery Size Range:	100 to 1700 CCA
Battery Voltage Range :	12V Batteries
DC Voltage: Range/Accuracy (Volts Mode)	5.0 to 39.9V +/- 2% of reading
LCD Color Graphic LCD Display	128 x 160 pixels resolution
Battery cable length	24"
Dimensions	6" x 3"
Weight	.5 lbs
Warranty	2 years
